

MicroSpeeder with ratcheting function. No swapping over of the spanner: a real time saver. Extra long design.

Quadruple MicroSpeeder. Just one tool for the four most important automotive fasteners.

Ratcheting function with 72-teeth inner gear ring, made of high alloy special steel allowing ratcheting even when the spanner can only be moved through 5°. With reverse lever for clockwise and anticlockwise rotation. Shaft of CrV steel with optimum surface protection: double nickel-plating and single matt-finished chrome-plating. With durable laser marking and easy-to-read sizes. Total length 210mm.

The Quadruple MicroSpeeder is somewhat bulkier when compared to using double ring MicroSpeeders 10 x 13 or 17 x 19mm. Also it cannot be passed through for sizes 13 and 19. But you have just one single tool in your pocket!
