

Precision tools: Tolerance +/- 1% (clockwise) and +/- 1,5% (anti-clockwise).

- ❶ Practical release mechanism: the socket is securely fixed and automatically released at the push of the button.
- ❷ Reverse lever for torque-controlled tightening of left- and righthand threads.
- ❸ LED indicator as visual signal - measuring unit.
- ❹ Digital display of preselect torque and measured values.
- ❺ Function keys to programme and control displayed values.
- ❻ Bluetooth interface for connection with smartphone or tablet.
- ❼ Vibration signal for sensorial indication.

Digital torque wrenches MicroClick MC 100/E and MC 200/E. Including test certificate.

Precision tool of high accuracy. Tolerance better than required by DIN/ISO: +/- 1% (clockwise) and +/- 1,5% (anti-clockwise). Bluetooth interface for connection with smartphone or tablet. For torque-controlled tightening of left- and righthand threads.

Ratchet mechanism with reverse lever. Digital display of preselect torque and measured values. Preselection of 10 different torques and 5 measuring tolerances (1 - 9%) is possible. Clearly signalled by visual, audible and sensorial (vibration) signal. Bluetooth interface for connection with smartphone or tablet for documentation of the measured values via app. Piece by piece calibration and final inspection. Including 3 AAA-type batteries for immediate use.
