

For repair and assembly of premium components.

- ❶ 1/4"-square drive and reverse lever for clockwise and anticlockwise rotation.
- ❷ Sturdy steel shaft with rust-protective finish: double nickel and subsequent matt-finish chrome-plating.
- ❸ Piece by piece calibration and final inspection. With permanent lasermarked serial number identifying the product.
- ❹ Clearly legible analogue display with additional micro-scale for fine adjustment.
- ❺ Pre-setting of the torque by turning the knurled ring at the end of the handle, fixing it by sliding it into position.

MicroClick torque wrench MC 15. For 3 to 15 Nm.

Automatic quick-release when tightening screws: Clearly audible and palpable click signal when the selected torque is reached.

Pre-setting of the torque by turning the knurled ring at the end of the handle, fixing it by sliding it into position. Clearly legible analogue scale display and additional micro scale for fine adjustment. Scale ring with 0.4Nm graduation. 1/4" square drive (6.3mm) with adapter for use of 1/4" standard screwdriver bits. Reverse lever for clockwise and anticlockwise rotation. Accuracy +/- 3 %. Total length 195mm.
