

Useful addition for the hot wire cutter THERMOCUT 230/E.

THERMOCUT fence TA 300

- ❶ Easy to move with clamping piece.
- ❷ Extra high fence (100mm) for safe cutting.
- ❸ Completely tilted with extra high fence (100mm) for perfect right-angled cuts. Ideal for pre-cutting large panels and producing thin panels.
- ❹ Fence tilting through 0 - 90°.

For the repeatable and precise production of geometric solids. For safe cutting of high work pieces.

Made of aluminium (finished working surface) for ideal ease of movement. Versatile in use: Freely selectable setting from 0 - 90° for exact angle cuts with high repeat accuracy. Integrated T-slot with additional angle stop for particularly intricate cuts.

NO 27 078

Note:

The THERMOCUT hotwire cutter is not included in the scope of delivery.
